

Manz Hungary

YOUR SPECIALIST IN THE FIELD OF SMALL PARTS, LARGE WELDED SUB-CONSTRUCTIONS AND COMPLETE MOUNTED UNITS

Manz Hungary Ltd. is your partner in the field of manufacturing small and large parts, complete mounted units and welded structures.

We offer efficient and precise machining with modern tools for our customers from different industries.

INNOVATIVE MANUFACTURING SOLUTIONS

We are your ideal partner thanks to our many years of experience, standardized procedures and high flexibility.

We support you in pilot and series production with the most efficient solutions given by our experienced specialists.

Our optimized processes and modern manufacturing solutions guarantee fast, precise and highly efficient processing.

YOUR BENEFIT

Our processes are adapted to the specific products and the material flow. Thanks to the cost-efficient value chain and production site in Hungary, we are able to deliver certified German quality at a fair price.

Our production site in Debrecen is advantageous with regard to manufacturing costs and location. Debrecen has its own airport and is reachable by car within two hours from Budapest.

OUR EXPERTISE

CNC milling and turning machines

Large parts machining on portal milling machines

131 MIG/135 MAG and 144 TIG welding processes

Vibratory stress relief by vibratory finishing and in heat treatment furnace

Surface treatment with wet painting

Surface preparation for painting by blasting and high-pressure cleaning

Mechanical and electrical assembly of mounted units

CAD-CAM production planning (Siemens SolidEdge, EdgeCam)

CERTIFIED QUALITY

Manz Hungary Kft. is certified
ISO 9001:2008 /
ISO 14001:2004

Manz Hungary

YOUR SPECIALIST IN THE FIELD OF SMALL PARTS, LARGE WELDED SUB-CONSTRUCTIONS AND COMPLETE MOUNTED UNITS

FLEXIBILITY, SAFETY, COMPETENCY—OUR STRENGTH IN MANUFACTURING

- Welding of sub-constructions on welding table
- Cost-efficient value creation and flexible manufacturing capacity
- Machining by divided work fields to reduce down time
- Selection and regular evaluation of qualified suppliers based on technical requirements, manufacturing experience, quality, capacity, costs and flexibility
- Higher requirements in point of accurateness and preciseness regarding the welding and cutting of large parts
- Multilingual communication
- Customer-specific NDAs with every customer
